Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson (2,688,893) in view of either Leitner (1,261,565) or Schlehr (1,393,399).

Jackson meets all of the limitations of the claim 1, except for inclined second face. Leitner and Schlehr teach spanners having inclined second face. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Jackson with the inclined second face as taught by either Leitner or Schlehr to adapt the tool for use in close places.

Regarding claims 2, 4 and 5, Jackson in view of either Leitner or Schlehr, meets the limitations as recited, however, it is noted that specific arrangement of element, e.g., starting point of the inclined surface for the different embodiment disclosed (even though teaching references together disclose both), would be further modification well within the knowledge of one of ordinary skill in the art with respect to workpiece and/or operational parameters.

Regarding claim 3, Jackson in view of either Leitner or Schlehr, meets all of the limitations except for the disclosed range for the angle, however, further modifying the tool of

prior art with respect to specific angle, e.g., 15 degrees, would be within the knowledge of one of ordinary skill in the art with respect to workpiece and/or operational parameters.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Response to Arguments

4. Applicant's arguments filed July 16, 2004 have been fully considered but they are not persuasive. The argument regarding including the limitations of original claims 4 and 5 in the new claims 6 and 7, is not persuasive, since as was indicated in the previous Office Action the angled face per embodiments in Figs. 3 and 4 as recited in the claims are both met by the prior art as cited. The argument regarding the range of the angle is not persuasive either, since all the references cited appear to disclose a range as recited without implicitly indicating the actual range, further evidence that the specified range event though appears to be disclosed is considered to be depended on the specific application and/or operational parameters, well within the knowledge of one of ordinary skill in the art.

5. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Meier and Yavner are cited to show related inventions.
